

CAA Pollutant Report

Facility Summary

ELECTRO CHEMICAL FINISHING
2610 REMICO ST. S.W., WYOMING, MI 49519

Facility Information (FRS)

FRS ID: [110000411732](#)
EPA Region: 05
Latitude: 42.908991
Longitude: -85.730135
Locational Data Source: FRS
Industry: Electroplating, Plating, Polishing, Anodizing, and Coloring
ICIS-Air Source ID: MI00000000000N2787
ICIS-Air Facility Status: Operating Minor Emissions

The Air Pollutant Report presents ten years of EPA air emissions data from the [National Emissions Inventory \(NEI\)](#), [Greenhouse Gas Reporting Program](#), [Toxics Release Inventory](#), and [Clean Air Markets Programs](#) for a selected facility. Emissions are presented by pollutant for each program and each year that values are available. Each of these programs is governed by a different regulatory authority and performs a distinct function. The NEI program includes both facility-reported and government-augmented emissions, while the other programs include exclusively emissions reported by facilities. While each program is distinct, there is some overlap in pollutants covered by the different programs. Where the same pollutant exists in multiple programs, the Air Pollutant Report will list each program's emissions estimates. Emissions values reported under multiple programs are not exclusive and should not be added together. Due to programmatic differences in calculation methods and how "facility" is defined, there may be significant discrepancies in emissions values between programs. By consolidating emissions data from four different EPA programs into one report, the Air Pollutant Report provides a single source for users looking to understand a facility's full suite of pollutants and the range of possible emissions associated with a given pollutant depending on the emissions program.
